Re: Monthly Report for March, 2009

We recorded 3.9 inches of rainfall in March as compared to 10.7 inches of rainfall in March, 2008. We used 530.0 million gallons (mg) of water for the month, which is 79.7 mg more than March of last year.

Our average usage this March was 17.1 million gallons per day (mgd) or about 166 gallons per person per day (gpcd). For March of 2008, we averaged 14.5 mgd for about 146 gpcd. Our daily water usage ranged from a minimum of 11.3 mgd on March 12 to a maximum of 28.2 mgd on March 3.

The sewer crews spent several days in March providing erosion protection for main sewer lines along Stewart Creek and the DNT, Panther Creek east of Preston Road, and Stewart Creek near Legacy Drive.

The Signs and Markings crew began working on sign installation for the new city's bike trail. The Street Division removed and replaced 25 cubic yards of concrete on a street repair near Teel Parkway and Birchridge Drive.
